Education

SRM Institute of Science and Technology — **Kattankulathur, Tamil Nadu**
B.Tech in Computer Science and Engineering w/s in Big Data Analytics — CGPA: 8.17 — 2023 – 2027

Sainik School Goalpara — **Goalpara, Assam**
Class XII (CBSE) — 71.4% — 2021 – 2022

Sainik School Goalpara — **Goalpara, Assam**
Class X (CBSE) — 85.8% — 2019 – 2020

Skills Summary

Programming Languages: C, C++, Python, SQL
Data Analytics & Engineering: EDA, Data Cleaning, ETL Pipelines, Data Modeling, Data Warehousing, Data Quality Monitoring
Visualization & BI Tools: Tableau, Matplotlib, Seaborn
Libraries & Frameworks: Pandas, NumPy, Scikit-Learn, PySpark (Basic), Streamlit, React.js, FastAPI
Databases: Oracle AI Database 26ai, PostgreSQL, MySQL, SQLite, SQLAlchemy
AI & Machine Learning: Classification, Regression, NLP, RAG, Text Embeddings, Semantic Search, Feature Engineering, Model Evaluation, Hyperparameter Tuning, XGBoost
APIs & AI Tools: REST APIs, OpenAI API, JSON
Cloud & Developer Tools: Git, GitHub, AWS (Basic), Jupyter Notebook, VS Code
CS Fundamentals: Data Structures & Algorithms, DBMS, Object-Oriented Programming, Operating Systems, Computer Networks

Projects

Real-Time Financial News Analytics & Stock Movement Prediction Platform [Link] *June 2026 – July 2026*
Python, XGBoost, FinBERT, PostgreSQL, SQLAlchemy, Pandas, Scikit-Learn, Streamlit, Finnhub API, GDELT API

- Developed an end-to-end Machine Learning Platform that ingests historical financial news from **GDELT** and live market news from **Finnhub**, performs **transformer-based sentiment analysis** using **FinBERT**, and predicts **BUY/HOLD/SELL** stock movements using **XGBoost**.
- Designed and implemented a scalable **ETL pipeline** and **PostgreSQL** data pipeline using **SQLAlchemy** to manage financial news, sentiment results, historical stock prices, engineered features, and real-time prediction history for production-style inference.
- Engineered **41 hybrid sentiment and technical features**, including RSI, MACD, EMA, SMA, Bollinger Bands, ATR, rolling sentiment metrics, and price momentum to improve predictive performance for **time-series classification**.
- Built a **real-time inference engine** that automates live news ingestion, sentiment analysis, feature engineering, model inference, **confidence scoring**, and persistent prediction storage, demonstrating an end-to-end **production-ready machine learning workflow**.

Oracle AI Vector Search – Intelligent Document Q&A System [Link] *Aug 2026 – Oct 2026*
Python, Oracle AI Database 26ai, FastAPI, React.js, Sentence Transformers, OpenAI API

- Developed an **end-to-end document Q&A application** supporting PDF/TXT uploads, text extraction, and intelligent document processing.
- Generated **384-dimensional text embeddings** using **Sentence Transformers** and stored document chunks and vectors in **Oracle AI Database 26ai** for semantic similarity search.
- Implemented a **Retrieval-Augmented Generation (RAG)** pipeline integrating vector retrieval with the **OpenAI API** to generate context-aware answers from uploaded documents.
- Built RESTful backend APIs using **FastAPI** and an interactive **React.js frontend**, integrating document uploads, semantic querying, and AI-generated responses.

Vendor Performance Data Analysis [Link] *June 2025 – July 2025*
Python, Pandas, NumPy, SQL, SQLite, Matplotlib, Seaborn, SciPy

- **Built a data analytics pipeline** to ingest, transform, and analyze **12.8M+ sales and 2.3M+ purchase records** using Python, SQL, and SQLite.
- **Analyzed vendor and procurement** performance through sales trends, purchase concentration, inventory turnover, bulk-purchase pricing, and statistical analysis to derive actionable business insights.

Certifications

- **Microsoft Certified: Azure Data Scientist Associate** [Link]
- **Google Advanced Data Analytics Professional Certificate (Coursera)** [Link]
- **IBM Introduction to Data Engineering (Coursera)** [Link]
- **Meta Database Structures and Management with MySQL (Coursera)** [Link]
